Evening Brief

Date: Monday September 28th, 2020

Weather Summary

An unusually strong high-pressure ridge along the West Coast will build eastward across the Great Basin starting today and continuing into the entire week. Afternoon temperatures will be 5-10 degrees above normal, along with afternoon humidity levels ranging from 10-17% across the southern half of the Great Basin, and 17-23% across northern areas. Fortunately, no significant winds, or lightning is expected during this time.

Otherwise, this week will be characterized by a significant warming/drying trend, as an unusually strong high-pressure ridge along the West Coast will build eastward across the Great Basin starting today and continuing into the entire week. Afternoon temperatures will be 5-10 degrees above normal, along with afternoon humidity levels ranging from 10-17% across the southern half of the Great Basin, and 17-23% across northern areas. Fortunately, no significant winds, or lightning is expected during this time.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 4	Light Initial Attack Activity
National	PL 5	New Fires and Acres: 8 fires for 2.5 acres. 2,290.5 acres Large Fire Growth

Fuels/Fire Potential

*** Fuel and Fire Behavior Advisory Remains in Effect for Parts of Idaho, Eastern and southern Nevada into Utah ***

Recent moisture and cool temperatures across northern and eastern areas has raised fuel moisture significantly across the mountains of Idaho and Western Wyoming, where ERC's have rapidly fallen back to near late September normals.

Otherwise, during this entire week, above normal temperatures and very dry conditions will bring about more rapid drying of fuels across all areas of the Great Basin. Fuels in the southern half of the Great Basin could once again reach near record level dryness.

Live Fuel moisture in low elevation brush remains critically dry, between 60-100% in most areas, which correlates with extreme fire behavior.

Resources:

Aviation within the Great Basin

- 1 VLAT(OOS), 2 LATs, 0 CL-415
- 22 SEATs, 5 FB, 13 AA, 0 ASM, 0 LP
- 12 Type 1 Helicopters / 11 Comm.
- 9 Type 2 Helicopters / 5 Comm.
- 20 Type 3 Helicopters / 14 Comm.

Crews Committed within the Great Basin

- 8 IHCs / 1 Available
- 15 Type 2IA / 1 Available
